1. Introduction

The actual student work (KKN) is one form of student service to the community, where students are required to play an active role in carrying out activities (noviyanti et al., 2018). They arrange to be realized, socialize, interact with people’s lives in a particular place or region by applying disciplines to the community (Syardiansah, 2019b). Therefore, the actual student work (KKN) program is a form of student service to the community and is part of the Tri Dharma of Higher Education (Eka Putra et al., 2019).

Universitas Pancasakti Tegal, as one of the educational institutions located in the Tegal city, should actively participate in development in institutional education, economics, and social (environmental empowerment). The participation is by students and the community around the campus or the wider community (Saputra et al., 2018). One form of active involvement in holding the actual student work is the Alternative to the real student work organized by the Institute of Research and Community Service (LPPM) Universitas Pancasakti Tegal and implemented by Universitas Pancasakti Tegal students Village Stage District Tegal Timur Tegal City.

Panggung village is one of Tegal Timur Subdistrict Tegal City; demographically, Panggung village has a lot of potential from each community (RW) in the village stage as home industry and fishery (Mulyani, 2020). In addition to the two prospects, there are still some other potentials, especially Pulo Kodok Beach, located on the coast of the stage village, which is its attraction from the village stage (Syardiansah, 2019a). However, in reality, in the field, a lot of home industries are still not optimized. Therefore, based on the above problems, the work program was implemented by the actual student work teams Panggung Subdistrict Of Tegal Timur Tegal City to optimize the function family as a community member (Suryadi et al., 2018).
